5235 Ravenswood Avenue

Chicago, Illinois 60640

Entrance to the Westermann publishing plant in Brunswick (Braunschweig), W. Germany

This catalog introduces a new series of large-scale geography wall maps to American schools. The maps are publications of the Georg Westermann Publishing House, one of the world's most important producers of graphic teaching aids. Founded in 1838, Westermann has ranked with the great publishing houses of the world for more than 100 years.

WESTERMANN GEOGRAPHY WALL MAPS •

In the past these large maps were available chiefly in foreign-language texts and so were of little interest to schools in this country at the intermediate and secondary levels, although the maps were used widely in the colleges and universities. Recently, English-text editions of many of the geography maps have been produced, and a total of 25 such maps is now being offered. All are pictured and described in this catalog. More are in preparation.

Westermann English-text geography maps are now available for all areas of the world—the world, eastern and western hemispheres, the continents, the great land masses, significant regions, the United States and some other important national entities. City plans are also offered. All Westermann maps are original publications and continuously brought up to date.

Teachers and students alike will find these maps especially colorful and interesting. Most are the physical-political type. Contour-color layering is combined with hachures and relief shading to indicate varying land elevations above sea level and the character of the terrain. Colors are bright and bold, catching and holding the eye. It is intended that students easily recognize the physical pattern at classroom distances. Lettering is clear and distinct. City symbols stand out well, and by their pattern reflect the densely settled urban areas.

Scales of the maps are related. All continent maps, except Europe, have identical scales of about 95 miles per inch. Related maps of the United States, Canada, and the Middle America-Northern South America region are on twice the scale. Maps of Asiatic areas—East and Southeast Asia, Middle East and India, and U.S.S.R./North Asia—have scales of 64 miles per inch. Such maps are easily comparable with one another. Together they make a very effective map "family."

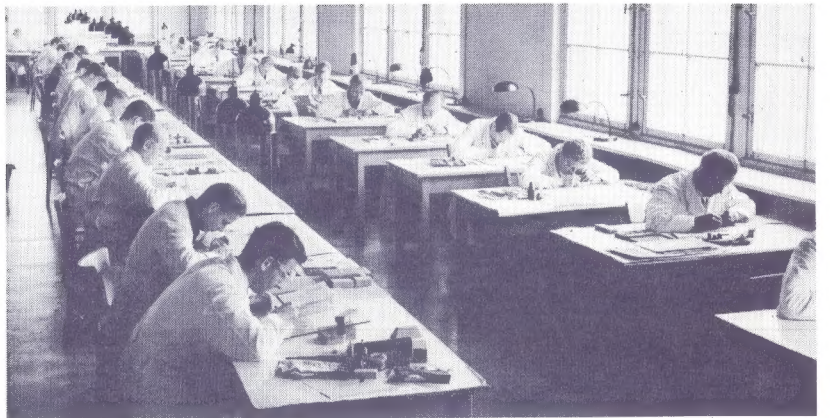

ON THE COVERS

On the front cover we picture an editorial conference in the Westermann offices with respect to a new wall map in production. The back cover shows in reduction a section of the physical-political wall map of South America, GWe6rp. It illustrates the coloring, the clear indication of land and sea contours and the detailed information contained on each physical-political map.

The Denoyer-Geppert Company is the exclusive agent in the United States and Canada for Westermann school maps and carries a large stock in Chicago. The maps are supplied handmounted on durable muslin and offered in the mountings most desired by schools. Prices shown are for the popular mountings. New steel racks have been developed to hold either four or six maps in close formation. These are maps in our Mounting -14, on spring roller and steel board with Fabrikoid cover. See inside back cover.

A group of cartographers at work. Westermann maps are continuously brought up to date.

PUBLISHED BY GEORG WESTERMANN • PRINTERS AND CARTOGRAPHERS

An eight-color press in operation printing one of many Westermann publications.

Stock room in the Westermann plant, showing printed sheets before they are trimmed and bound into book form.

While this catalog is intended primarily for geography departments, we feel that we should make known the fact that there is now in the Westermann line an outstanding series of history wall maps. We would appreciate your passing the word along to your colleagues in the history department. We have a special catalog of history maps (FM63H) which lists and describes the Westermann and other history map series in considerable detail.

H224 Medieval Times. 5th to 16th century.
Hardboard covers, ppd.....3.75

H225 Modern Times. To the present day.
Hardboard covers, ppd.....3.75

HOW TO ORDER

Full Information Speeds Service . . .

Prevents Errors

PLEASE GIVE . . .

- Quantity of each item.
- Title of each map.
- Catalog number.
- Mounting code number. See description of mountings on inside back cover.
- Unit prices and totals.
- Complete shipping address and name of the individual or department to whose attention shipment is to be made.
- Name of account to be billed, i.e., board of education, school district, private school, college or university.
- Your name and position.

PRICES

The price of each map varies with its size and the type of mounting in which it is ordered. In accordance with our long standing custom, all school, college and library discounts have been deducted in advance, and all prices are net, f.o.b. Chicago, unless otherwise specified. Federal and state taxes, when applicable, will be billed in addition to these prices.

Prices are subject to change. When it becomes possible to lower prices, orders will be billed at the lower price prevailing at the time the order is received, even though a higher price has been quoted in this catalog. If it has been found necessary to raise prices, purchasers will be notified before the order is shipped.

DELIVERY

Although the Denoyer-Geppert Company carries in stock a large inventory of Westermann maps, immediate delivery cannot always be made. After orders are received and billed, maps must be mounted to order. If stocks happen to be depleted, it may take some time to order from the publisher, clear the maps through customs, etc.

For these reasons the customer is asked to order as far in advance of desired delivery as possible, and to be patient when awaiting delivery. Items in stock will be shipped as soon as possible, and back orders will be made for those temporarily out of stock.

TERMS

Terms are net 30 days, subject to credit approval.

GWe4h AFRICA FROM COLONIZATION TO INDEPENDENCE, political-historical, 80x72"

GWe4h

AFRICA FROM COLONIZATION TO INDEPENDENCE

Political-Historical

80x72 Inches

Scale 95 Miles per Inch

Shows the political organization as of 1962, with each political entity in a separate color. Also indicates railway lines, roads, canals, dams and reservoirs, waterfalls, wadies, pipelines, airports, ruins and oases. Location of deposits of gold, copper, tin, uranium, coal, oil, bauxite

and diamonds are shown, as are salt pans, desert and semi-desert areas, steppe, savanna, dry and wet savanna, swamp and tropical rainforest areas. Cities by symbols graded according to population. Four insets: European settlements and possessions until 1824; colonial divisions 1824-1914; European colonies until 1950; and Africa in 1962.

PICTORIAL WALL MAPS

25 Maps in Vivid Colors • Sizes 38x50", 54x63" or 75x55"

Stimulate interest in geography and supplement abstract geographical wall maps

Pictorial wall maps do not show abstract symbols as do conventional wall maps. Instead they portray natural representations of a wide range of subjects. In this Westermann series, these include wild animals, vegetation, peoples, domestic animals and cultivated plants, which are positioned on the maps in their proper geographical location.

The maps greatly simplify understanding of abstract maps and help children make the transition to conventional maps. They have eye appeal and inspirational value.

Many relationships can be deduced from them:

- Interdependence of vegetation and animal life.
- Surface configuration and transport.
- Landscape belts, water supply and agriculture.
- Man and his cultures.
- Natural resources and industry.

DESCRIPTION OF MOUNTINGS

Mountings are designated by code numbers so that it is unnecessary to give a full description of them each time. When ordering, the mounting code number should be written immediately after the catalog number of the map, i.e., GWe1rp-14, in which GWe1rp designates the map number for the U.S. map and -14 is the mounting code number for a map hand-mounted on muslin and attached to a spring roller and steel board for mounting on the wall.

All Westermann wall maps are clothbacked and fitted with mountings by Denoyer-Geppert Company.

Mounting -14. The map is handmounted on durable muslin and attached to a spring roller and steel board. A dustproof cover at the bottom front protects the map when it is rolled up.

Mounting -10. The common roller mounting and perhaps the most popular. The map is mounted on a good grade of muslin. Basswood moldings are fitted top and bottom. The map is hung from metal rings. A tape for tying the map when it is rolled up is also supplied.

Mounting -15. The most durable mounting. Map is handmounted on muslin, attached to a spring roller and inserted into an octagonal steel case for wall mounting, the map rolling face in.

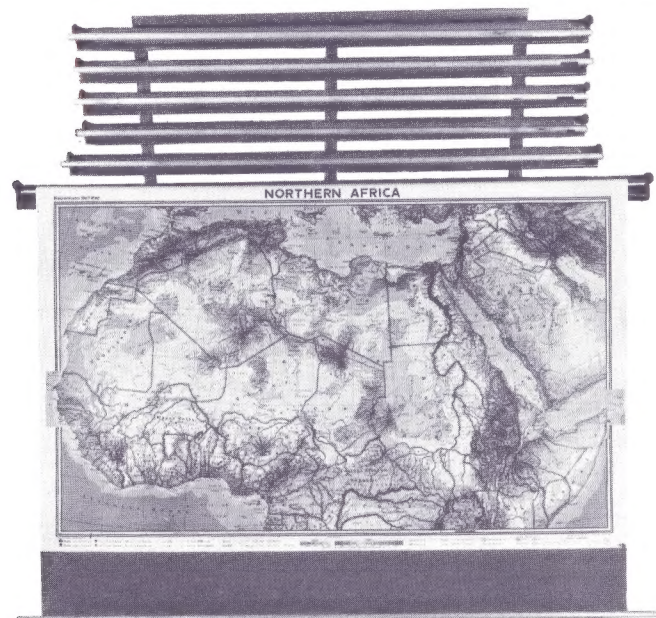

Mounting -1D. The map is cut into sections, generally 9x11", and handmounted on muslin. It is provided with eyelets for hanging and a Fabrikoid cover for protection when folded. When ordering specify folded size desired. It is recommended that large maps should not be cut into a large number of sections.

Mounting -1P. Paper sheets only. Multi-sheet, not trimmed, not mounted on muslin. Price is 40% less than the Mounting -10 price. Sheets are shipped postpaid.

FOR SETS OF LARGE WALL MAPS

HEAVY-DUTY MAP DISPLAYER RACK

Of steel construction, these new heavy-duty racks will hold maps up to 117" wide in Mtg. -14 units. They are designed to be hung above the blackboard attached to separate vertical or horizontal moldings. The racks can be hung flat against the wall or tilted. The latter is recommended to minimize wear on maps. It is also recommended that narrower maps be mounted above the wider maps.

SX444 Four-Unit Heavy-Duty Racks, 66x24"	\$30.00
SX666 Six-Unit Heavy-Duty Racks, 66x34"	35.00
One X17 Pull Stick included with each rack.	

Separate 72" oak boards in natural finish for use as moldings, either up-right or horizontal, to which the racks can be attached can be supplied at \$3.75 each.
